DOSE: 0.5 ML
DO NOT RECONSTITUTE

Must be Moderna

2 MONTHS

BIVALENT BOOSTER (12+)
DOSE: 0.5 ML
DO NOT RECONSTITUTE
WHO CAN MIX AND MATCH BOOSTERS?

Booster guidelines are age dependent.
You are able to choose the booster based on your age.

• Patient 5 y/o: only eligible for Pfizer
• Patients 6 y/o +: eligible for Pfizer and Moderna
DISCONTINUED MONOVALENT VACCINES

- Moderna is discontinuing their monovalent COVID vaccines. Monovalent Moderna will no longer be available for pediatrics and adults.
- Johnson and Johnson is discontinuing their COVID vaccine. The Janssen vaccine will no longer be available on sites.

*We will continue to provide Monovalent Pfizer on sites and a series can be completed using Monovalent Pfizer.*
WHO CAN GET A BIVALENT BOOSTER?

Updated Boosters Are Recommended

**CDC recommends one updated (bivalent) booster dose:**

- **For everyone aged 5 years and older** if it has been at least 2 months since your last dose and your primary series I completed.
- **For children aged 6 months–4 years who completed the Moderna primary series** and if it has been at least 2 months since their last dose.

There is no booster recommendation for children aged 6 months–4 years who got the Pfizer-BioNTech COVID-19 vaccine primary series.

*everyone is eligible to get one bivalent booster, regardless of how many doses received in the past*
